SUMMARY

I am a B.Tech Electronics and Communication Engineering student (2026) with a passion for developing Android applications, exploring IoT systems, and working with cloud technologies. I enjoy learning new tools, building projects like an Instagram-style social app and an IoT-based security system, and applying my skills in Java, Python, Firebase, and AWS to create practical solutions. Known for being curious, adaptable, and eager to take on challenges, I aim to grow as a developer while contributing to meaningful projects.

SKILLS

Programming & Development: Java, Python, C, Android Studio, Firebase (Auth, Firestore, FCM), Cloudinary

Mobile App Development: Android UI/UX, RecyclerView, Fragments, Push Notifications

IoT & Electronics: Sensors, Arduino, Raspberry Pi, IoT Security Systems

Cloud Platforms: AWS (EC2, S3, Cloud Fundamentals)

Design & Tools: Figma, Blender, Shapr3D, Canva, Adobe Premiere Pro

Soft Skills: Fast learner, teamwork, adaptability, professional communication

PROJECTS

MyInsta – Social Media Application 📄 [\(Github Link\)](#)

- Developed a social media application using Java, Firebase, and Cloudinary, replicating Instagram's core features.
- Implemented user authentication, profile management, media uploads, real-time one-to-one chat, and status updates with auto-deletion after 24 hours.
- Integrated Firebase Cloud Messaging (FCM) with a Node.js backend for secure push notifications.
- Designed smooth navigation using RecyclerView, Fragments, and BottomNavigationView.

IoT Security Box (Design and Implementation)

- Created a smart IoT-based security box for secure object storage.
- Integrated sensors and automation features to provide real-time alerts.
- Certified project showcasing IoT and embedded systems expertise.

INTERNSHIPS

APSSDC Internship – Android Application Development (May 2025 – July 2025)

- Completed a two-month hands-on internship in Android app development.
- Gained practical experience in Java-based Android programming, Firebase integration, and UI/UX design.
- Strengthened skills in building scalable, real-time mobile applications.

APSSDC Internship – Employability Skills (May 2024 – June 2024)

- Completed a six-week internship focused on professional communication, teamwork, and workplace adaptability.
- Improved skills in presentations, resume writing, and interview preparation.

EDUCATION

B.Tech in Electronics and Communication Engineering

Aditya College of Engineering and Technology, Surampalem

- 4th Year | CGPA: 6.76 | Expected Graduation: 2026

CERTIFICATIONS

- Python Certification
- C Programming Certification
- IoT Security Box Project Certification
- AWS Cloud Computing – APSSDC (Oct 2024)
- Android Application Development – APSSDC (Jul 2025)
- HackerRank Python (Basic) Certification – Verified

ACHIEVEMENTS

- HackerRank Badges: Python (5★), Java (1★)
- Built and deployed full-stack mobile apps with Firebase
- Active learner in problem-solving and competitive coding on HackerRank
